-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-41 remain rejected under 35 U.S.C. 102(e) as being anticipated by Gardiner et al US 2003/0062413 A1.

Gardiner discloses a code scanner in which multiple different LEDs are independently illuminated to control the color emitted by the scanner [0011]. A control circuit is configured to “readjust” (examiner’s words) the color output of the LEDs [0184]. A color image sensor and appropriate filters are provided [0188]. At least two separate monochrome “illuminations” can be achieved by varying the output of the separate colors of LEDs [0189]. At least red, green, blue, UV and IR LEDs are provided [0194]. 1D and 2D codes are imaged by the multi color LED illumination scanner [0229]. Appropriate memory and processor capabilities are also provided. A lensing system for focusing is also disclosed (fig 6y for example). A removable illumination module is shown in figures 6. A U-shaped configuration of LEDs is shown, for example in figure 6g connecting 3 line segments between the 4 corner LEDs shows a U-shape.

3. Applicant’s arguments filed 5/23/05 have been fully considered but they are not persuasive. Applicant argues that Gardiner does not disclose separating into

monochromatic images and determining at least one decodable monochromatic image.

The examiner respectfully disagrees. It appears that applicant is suggesting that multiple images are imaged simultaneously. However, there is no element recited in the claims which requires this. The examiner asserts that Gardiner does in fact disclose imaging and decoding at least one image and that this image may be illuminated by different colors as required and the reflected light to be filtered as to only process at least one monochromatic image. Further, it is anticipated by Gardiner that more than one colored image may be "imaged". The examiner does not contest that Gardiner does not disclose multiple colored images are simultaneously imaged, as suggested in applicant's arguments. However, this "simultaneous" is not yet claimed.

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Karl D. Frech whose telephone number is (571) 272-2390. The examiner can normally be reached on maxi-flex.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael G. Lee can be reached on (571) 272-2398. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
